Introduction

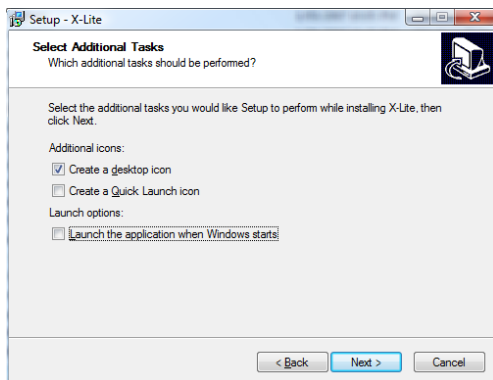

This manual will guide you through the setup, and configuration of Counterpath's X-Lite software.

Download and Setup X-Lite

1. Within your web browser, download the application from <http://tinyurl.com/xlite-windows>
2. Save the file to your desktop and then run the application

3. Click Next, Accept, then Next once more. You can decide if you want the program to launch automatically each time your computer starts

4. Click Next, then Finish to complete the installation

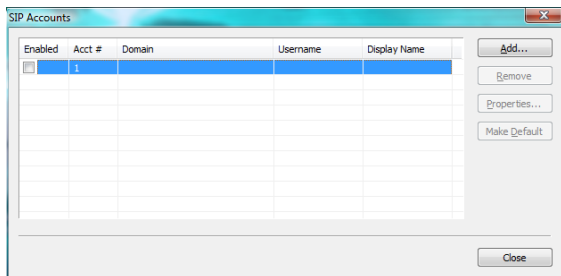

Configuration

1. After running the application, you will see a window like this:

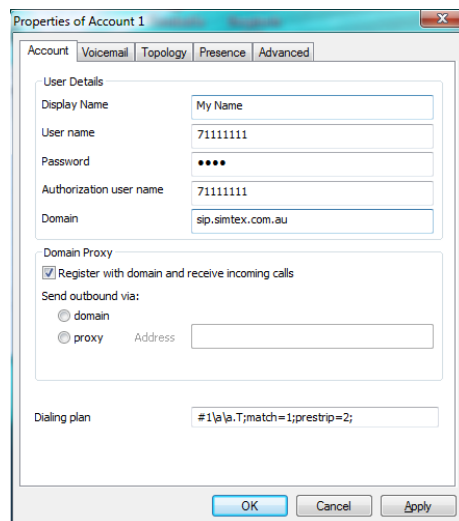

2. **Right click** in the middle of the phone's screen, and select **SIP account settings**

3. Click the **Add** button, and enter the following:

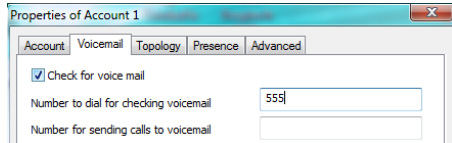

Display Name: *Your full name*
 User name: *your account number (eg 71111111)*
 Password: *your PIN (xxxx)*
 Authorization user name: *your account number (eg 71111111)*
 Domain: *sip.simtex.com.au*

Register with domain and receive incoming calls: *Ticked*
 Dialling plan: *delete everything, leave it blank!*

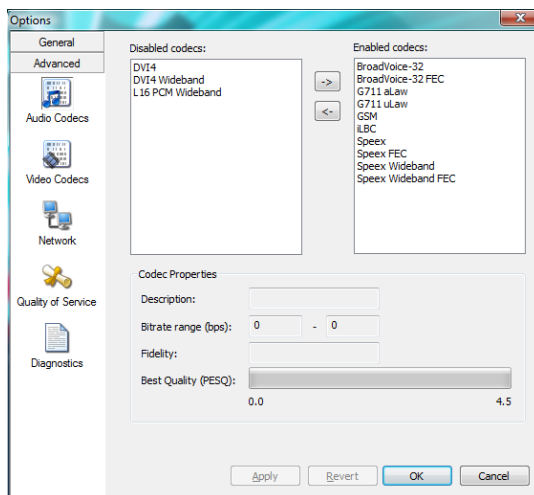

4. Click **Voicemail** along the top, and enter **555** as the number for **checking voicemail**

5. Click **OK**, then click **Close**
6. In order to increase call quality, you may want to change the CODEC order, this is done by **right clicking on the screen**, and selecting **Options**
7. Click **Advanced** down the bottom left, then select **Audio Codecs**

8. Adjust the Enabled codecs to be in the order: GSM, iLBC, Speex etc etc
